AGILEBA®
FOUNDATION & PRACTITIONER

DURATION: 4 DAYS

BUSINESS ANALYSIS

Developed by APMG in partnership with the DSDM Consortium, AgileBA® is a new guidance, training and certification scheme designed for business analysts working in an agile environment.

This 4-day Foundation & Practitioner AgileBA course has been designed to give the Business Analyst the skills needed to successfully gather, analyse, validate and champion the requirements throughout an Agile project. It also gives context to the Agile Business Analyst role beyond the individual project, in relation to organisational mission and strategy, providing additional depth and guidance for business analysis in an agile context.

WHO SHOULD ATTEND

The AgileBA course is designed to benefit a wide range of roles including:

- Business Analysts
- Change Analysts
- Project Managers
- Scrum Product Owners/Managers
- Systems Analysts
- Agile Developers.

COURSE CONTENTS

- The role of business analyst in an agile world
- Agile fundamentals and the agile BA
- The agile business case
- Stakeholders in the agile project
- Requirements and user stories
- Prioritisation
- Workshop
- Modelling
- Timeboxing and Iterative Development
- Requirements planning and estimating throughout the lifecycle
- The requirements lifecycle in an agile project
- Making the transition to agile BA

LEARNING OUTCOMES

BENEFITS FOR THE INDIVIDUAL

The Agile Business Analyst certification provides business analysts involved in Agile projects, large and small, with the tools they need to adopt an agile approach. It gives advice on focus and value-delivery and guidance on working with business stakeholders, developers, testers and outlines the skills needed to deliver solutions incrementally. It equips the business analyst with techniques to incorporate Agile approaches into a programme and to align change with organizational objectives.

Individuals will gain:

- Knowledge and understanding of AgileBA
- Agile Business Analysis techniques
- How to move from traditional to more agile ways of working

BENEFITS FOR THE ORGANISATION

AgileBA will provide an organisation with a standard approach to executing agile projects, as the approach is aligned with AgilePM and AgilePgM.

Implementation of AgileBA delivers the following advantages:

- Informs Agile and traditional project managers – who often also have business analysis responsibilities, of the content of an Agile business analyst role in addition to educating them on Agile techniques.
- Scrum developers will benefit from gaining an understanding of the Business Analyst role. AgileBA fills the gap of lacking Business Analyst understanding as a result of there being no defined roles for Scrum developers.
- Product Owners will benefit from the Agile development skills delivered during the AgileBA training courses.

ALC is accredited by APMG to deliver AgileBA Training at both Foundation & Practitioner level.
